

Sustainable Procurement Policy Statement

2020

PURPOSE

The purpose of this document is to state and communicate the Swift Construction Group Sustainable Procurement Policy to employees, suppliers, sub-contractors and other interested parties.

The aim of this policy is to ensure the application, management and administration of a consistent set of sustainable procurement requirements by Swift Construction Group. Implementation of this policy will support the business to achieve its own sustainability commitments and contribute to the UK Government's goal of sustainable development. It will also help Swift Construction Group to achieve its vision to be 'sub-contractor of choice' by promoting sustainable procurement activities, including appropriate support for businesses local to its area of operation and appropriate management of human rights, health and safety and environmental issues.

SCOPE

This policy applies to Swift Construction Group only. It outlines Swift Construction Groups approach to working with suppliers and sub-contractors to meet sustainability commitments relating to:

1. The products and services that Swift Construction Group buys.
2. The organisations with which Swift Construction Group conduct business.
3. The contracts that Swift Construction Group manages.

SUSTAINABLE PROCUREMENT POLICY

Swift Construction Group endeavours that all procurement activities undertaken are to be conducted in a manner to promote the concept of sustainability.

As a minimum Swift Construction Group expects suppliers and sub-contractors to comply with national laws in the countries in which they operate and with the standards of performance described in Swift Construction Group Sustainable Procurement Supplier Guidelines, across four areas of sustainability:

1. Business ethics, good governance and the promotion of anti-corruption. This includes appropriate support for business and services that are local to our areas of operation.

Sustainable Procurement Policy Statement

2020

2. Labour standards and human rights, particularly in relation to the elimination of child, forced or bonded labour.
3. Health and safety standards on and off Swift Construction Group sites and arrangements for the security of employees, customers, buildings and property.
4. The prevention, reduction and management of negative environmental impacts associated with products purchased or used by Swift Construction Group.

Swift Construction Group will communicate this policy internally to employees and make available externally to suppliers, sub-contractors and other interested parties. Swift Construction Group Commercial Director is responsible for the maintenance, revision and communication of this policy. This person will also ensure that effective procedures or tools for meeting the policy commitments are developed and implemented.

1. Responsibility for meeting the policy commitments is devolved to contracting officers within all departments where procurement, contract negotiations and contract management take place.
2. Swift Construction Group will inform its supplier and sub-contractor selection and on-going supplier and sub-contractor management by evaluating supplier and sub-contractor risk exposure and management across the sustainability issues identified in this policy.
3. For existing suppliers and sub-contractors and contracts awarded before the implementation of this policy, Swift Construction Group will endeavour to work with those suppliers and sub-contractors to enable them to meet our sustainability requirements where at present they are not.
4. Swift Construction Group will report the outcomes or periodic supplier evaluation to the directors for their review and approval.
